JV2010: What Will Be Different?

Full Spectrum Dominance

Information Superiority

- Network-centric
- Higher level architecture
- Common operational picture
- Collaborative planning systems
- Enhanced C2 systems

Technological Innovation

- Increased stealth, mobility, flexibility
- Ability to integrate all systems--sensors, C2, weapon platforms, etc.
- "Killer Apps"--sensors, robotics, nanotechnology

Dominant Maneuver

- Rapid Joint Force Projection
- Tailored Forces with:
  - Increased lethality
  - Greater deployability
  - Better battlespace awareness
  - Increased force protection
  - More sustainable

Precision Engagement

- Pinpoint system accuracy
- Complete suite of overwhelming lethal and non-lethal engagement capabilities and effects generated
- Total fratricide prevention

Focused Logistics

- CONUS to combat
- Greater deployability-faster
- Minimal inventory, logistics footprint, and response time
- Total asset and in-transit visibility
- Improved Joint Logistic Management System
- 2010 Joint Vision logistics

Full Dimensional Protection

- Theater air missile defense
- Enemy threat identified and defeated rapidly
- Assets protected from individual to theater level

JV2010 Beyond DOD-Interagency

- National Security Vision--an effective, integrated, proactive, quick-reacting unified action process
  - "Mini Marshal Plans"
- Integrated pol-mil plan before execution
  - Crisis Action (NV21)
  - Deliberate planning (Annex T)

JV2010 Beyond DOD-Coalitions

- Coalitions that leverage the strengths of each partner
- Enhanced capability in offensive & defensive ops
- CINC center of excellence for coalition doctrine, training
